MIGRATE CONNECTIONS CLOUD?
YES WE CAN!

END-OF-SERVICE FOR CONNECTIONS CLOUD

JULY THE 16th 2020

July 2020

On July 16, 2020, the service previously called IBM Connections Cloud will end. This means that after this date, all clients will be disconnected from Connections Cloud and their data will no longer be accessible.

e-office Connections Migration Tool

e-office understands that this could be a major problem for clients using Connections Cloud. Therefore e-office created a tool named ECMT (e-office Connections Migration Tool) to help you migrate your data from Connections Cloud to HCL Connections (private cloud or on premise). ECMT exports the data to the file system and then imports the data to HCL Connections.

Our goal is to maintain the same content, links, @mentions, user access, user roles, layout and membership in the new environment as it has been in the original environment in Connections Cloud.

The image to your right shows you a quick overview of the tool with the parts involved during a migration.

Import into
HCL Connections on premise
or anoother environment

MIGRATION EXECUTED IN 3 STEPS

Analysis	ECMT analyses your companies Connections Cloud subscription and creates a report. This report holds important information about your subscription, profiles and communities, file size and data usage.
Export	ECMT exports data from IBM Connections Cloud to the file system. Meta data is saved in the mongoDB
Import	ECMT imports the files from the file system and the meta data into your new environment.

If you would like to know more about our ECMT solution to migrate your data to a new environment, please contact Rene Rietveld via e-mail: **Rene.Rietveld@e-office.com** | www.e-office.com
